Summary

I'm a QA Analyst with about a year of experience in testing. I've worked on both manual and automation testing, mainly using WebdriverIO with JavaScript. I'm good at spotting issues, writing and running test cases, and making sure applications work smoothly before release. I enjoy working in a team, learning new tools, and improving the way testing is done.

Experience

Cognizant Technology Solutions   February 2025 – Present

QA Analyst

- Executed **smoke, sanity, and regression test cases** in multiple environments such as **UAT, IT, and Pre-Production** to ensure product quality.
- Developed and executed **automation scripts** using **WebdriverIO with JavaScript.**
- Managed Git workflows: resolved conflicts, reviewed comments, created branches for product releases, and maintained the codebase.
- Analyzed **test case failures**, logged defects, identified root causes, documented findings, and generated detailed **test reports.**
- Collaborated with stakeholders and developers to understand **user stories (requirements)**, and **created test plans, objectives, scope, scenarios, and test cases** to improve testing efficiency.
- Participated actively in the **Software Testing Life Cycle (STLC)** and followed **Agile methodology.**
- Logged and tracked defects in **JIRA**, ensuring timely resolution through close collaboration with the development team.
- Participated in **Agile ceremonies** including sprint planning, backlog grooming, and retrospectives.
- Contributed to improving **test coverage** and reducing manual effort by automating **repetitive test cases**.
